CANDY 5 HD

CANDY 5 HD

5" LCD Close-up and Near-distance Video Magnifier with Three-position Handle, Self View Image and Long-lasting Rechargeable Battery

The new CANDY 5 HD features a 5" high-definition wide-screen LCD and continuous zoom magnification from 3x - 22x. This versatile video magnifier has an intuitive center-position HD autofocus camera and can be used as either a "handheld" or "stand" magnifier. Use CANDY 5 HD at home or take it with you to school, work, a restaurant, pharmacy, bank, library, grocery or department store or on vacation.

Crystal-clear, Color-rich HD-quality Image

CANDY 5 HD produces a vibrant natural color image for viewing maps, graphs, pie charts, CD or DVD covers, gift catalogs, family photographs and other color-sensitive materials. Additionally, the enhanced B/W, high-contrast reverse (white-on-black), and two customizable text/background color settings can make reading books, magazines and other text-based materials easier and more comfortable on your eyes.

Ergonomic Design and Unique Features

CANDY 5 HD's exclusive 3-position ergonomic handle accommodates both left and right-handed users. All buttons are within easy reach while holding the handle. CANDY 5 HD is the only handheld video magnifier that has a convenient image capture button right on the handle. Fold the handle under to use directly on your reading material, or place the unit onto its reading stand to sort through mail, read a greeting card, letter from a doctor, newspaper or magazine article and more.

Close-up and Near-distance Magnification

Use the innovative near-distance magnification to view prices and products on a shelf at the store, a sign over a doorway, a map, or a posted bus schedule. And, CANDY 5 HD is the only handheld video magnifier featuring a Mirror View (self view) that helps you to apply make-up and perform other grooming needs.

More innovative and user-friendly features than any other 5" handheld video magnifier

- Sharp color-rich HD-quality image
- Continuous zoom magnification from 3x - 22x
- Ergonomic 3-position handle with freeze button
- Innovative near-distance magnification viewing
- First and only Mirror View camera in a portable unit
- Ability to capture and save up to 5 images
- User-customizable color contrast settings
- Long-lasting 4.5 hour rechargeable Lithium battery
